

## What Others are Saying

"Each child's needs are met regardless of what those needs are."-

Emma's mom

## What Makes Us Unique

**CHILD-DIRECTED INTERACTIONS**

**INDIVIDUAL THERAPY**

**PLAY-BASED**

**CAREGIVER TRAINING**

**FREE PHONE CONSULTATIONS**

**SCREENINGS AVAILABLE**

## About Us

Pediatric Therapy and Learning Center is a clinic-based center for children who are experiencing developmental challenges in the following areas:

- speech delays
- language comprehension
- reading/writing
- emotional regulation
- sensory aversions
- behavioral issues (outbursts, tantrums, etc)
- handwriting difficulties
- attention
- coordination and strength
- picky eating
- social interaction

Our therapists have specialized training and certifications in Ayres Sensory Integration, DIR/Floortime, PROMPT, SOS Feeding Approach, TOTS, and many other pediatric techniques.

## Caregiver Training

We offer multiple ways to help parents & caregivers learn to support the child at home and in the community.

- individualized parent coaching
- in-person courses
- online courses

## Speech-Language Therapy

**Our speech-language therapists use play and context-based strategies to help children communicate efficiently and effectively.**

- Speech Developmental Milestones
- Articulation/Intelligibility
- Apraxia of Speech
- Oral Motor Deficits
- Expressive Language
- Receptive Language
- Non-verbal Communication
- Speech Fluency (stuttering)
- Pragmatics and Social Skills
- Augmentative Communication (AAC)
- Reading Comprehension
- Writing Fluency

## Occupational Therapy

**Our occupational therapists assist children with a variety of abilities in order to help them to be successful in their daily lives.**

- Self-regulation
- Attention
- Behavioral Difficulties
- Sensory Processing Disorders
- Fine motor skill development
- Handwriting
- Self care skills (dressing, toileting, etc)
- Visual motor skills
- Play skills
- Balance, Coordination, Strength & Endurance

## Feeding Therapy

**Our feeding therapy team is comprised of an occupational therapist and a speech-language therapist. Together, they can assess if the child is a picky eater or a problem feeder and help increase the amount and variety of foods in his/her diet.**

- Food aversions
- Avoidant of certain textures
- Limited diet/range of foods
- Oral motor difficulties (chewing and drinking)

## Connections Sessions

**Connections is our extended/intensive services option. This program consists of play sessions with a purpose & can be added on to a child's regular therapy services to increase intensity or expand opportunities to work on developmental goals.**

- Connections providers trained by our DIR/Floortime certified therapists
- Play sessions designed with developmental goals in mind
- Child must be enrolled in at least one therapy service at our clinic to be eligible for Connections Sessions.
- Flexible Scheduling, with multiple sessions per day possible
